

Here are some harmless steps you can try when your website doesn't seem to be working.

Get the full instructions and explanations at facingyourscreen.com/wp-emergency-toolkit/ or scan the QR code to jump there fast!

Refresh the browser window
(CTRL-R / CMD-R)

Clear your browser cache

Check in a private/incognito window

Try a different browser
(Chrome, Safari, Edge)

Take a screenshot
(PrtScrn / Cmd-Shift-4)

Check your internet connection

Check the Javascript console

Check if you're logged in to WordPress

Try a different device

Ask a friend to have a look

Clear your cookies
(will log you out of all sites)

Try Live Preview to test your theme
